"Molecular cloning and expression of a third type of rabbit GDF-L-
fucose:beta-D-galactoside 2-alpha-L-fucosyltransferase.";

J. Biol. Chem. 27:116975-16981(1996)

-!- FUNCTION: CREATES A MEMBRANE-ASSOCIATED PRECURSOR OLIGOSACCHARIDE
FUC-ALPHA((1,2)GALBETA-) CALLED THE HANTIGEN WHICH IS AN
ESSENTIAL SUBSTRATE FOR THE FINAL STEP IN THE MEMBRANE-ASSOCIATED
A AND B ANTIGEN SYNTHESIS PATHMAY. HAND SE ENZYMES FUCOSYLATE THE
SAME ACCEPTOR SUBSTRATES BUT EXHIBIT DIFFERENT KM VALUES.

-!- CATALYMIC ACTIVITY: GDF-L-FUCOSE + BETA-D-GALACTOSYL-R = GDF +
ALPHA-L-FUCOSYL-1, 2-BETA-D-GALACTOSYL-R = GDF +

MEMBRANE-BOUND
FORM IN TRANS CISTERRARE OF GOLGI.
-i- TISSUE SPECIFICITY: ADULT GASTROINESTINAL TRACT AND COLON.
-i- MISCELLANEOUS: THERE ARE THREE GENES (FUT1, FUT2 AND FUT3) WHICH
ENCODE GALACTOGIDE 2-L-FUCOSYLTRANSFERASE IN RABBIT. THEY ARE
EXPRESSED IN A TISSUE-SPECIFIC MANNER.
-i- SIMILARITY: STRUCTURAL SIMILARITY WITH THE OTHER MAMMALIAN
GLYCOSYLTRANSFERASES.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        CYTOPLASMIC (POTENTIAL).

"Molecular cloning and expression of a third type of rabbit GDP-L-
"Lucose:beta-D-galactoside 2-alpha-L-fucosyltransferase.";

J. Biol. Chem. 27:16975-16981(1996)

-!- FUNCTION: CREATES A MEMBRANE-ASSOCIATED PRECURSOR OLIGOSACCHARIDE
FUC-ALPHA((1,2)GALBETA-) CALLED THE H ANTIGEN WHICH IS AN
ESSENTIAL SUBSTRATE FOR THE FINAL STEP IN THE MEMBRANE-ASSOCIATED
A AND B ANTIGEN SYNTHESIS PATHWAY. H AND SE ENZYMES FUCOSYLATE IHE
SAME ACCEPTOR SUBSTRATES BUT EXHIBIT DIFFERENT KM VALUES.

-!- CATALYTIC ACTIVITY: GDP-L-FUCOSE + BETA-D-GALACTOSYL-R = GDP +
ALPHA-L-FUCOSYL-1, 2-BETA-D-GALACTOSYL-R = GDP +

* NOTE: This is a 'working draft' sequence. It currently
* consists of 14 contigs. Gaps between the contigs
* are represented as runs of N. The order of the pieces
* is believed to be correct a given, however the sizes
* of the gaps between them are based on estimates that have
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  1 CICCAGCAGCGAATAGTGAAGCTCCAACCCCTGTCAGAGAAGGAATTACCGATGACGACT
